

POWER SUPPLIES:

GENERAL: Both H-ITT base RX2100 and RX4000 can be powered with a 9 volt power supply when not directly connected to a computer through a USB connection. In addition, for the RX2100 base units that are daisy chained together with the CAT5 cable, you only need one power supply connected to any one of the base units in the chain (five base units maximum per chain)
Power supplies have a 2.1mm DC plug, center positive.

AC-9VDC-US: Supplies 9VDC power from standard North American 115V outlet.

AC-9VDC-INT: Supplies 9VDC power from various international standard power outlets using the adapters pictured.
