

READ ME H-ITT CRS ver 2.4.x

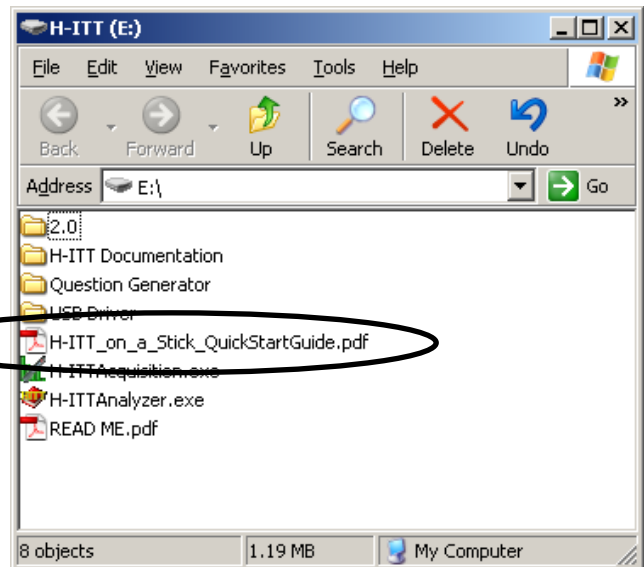

The H-ITT CRS Interactive Classroom Response Software is pre-installed on the USB drive, and all class files will be saved to this drive. This can be used in situations where the user is not allowed to install software onto the computer to be used, or the classroom computers are cleaned, or frozen by the IT department.

If you are installing the on-line Zip version to a USB drive, see the quick start guide for instructions (step 1 below). If you want to install this CRS version on your PC (not on a USB stick) see the "Install this ver on your PC" directory in the H-ITT Documentation folder.

H-ITT has many software applications in addition to the CRS (on this USB drive) plus additional help guides and templates that are available for free download at H-ITT.com.

STEP 1. Insert the USB drive into your computer, and open the file H-ITT on a stick QUICK START GUIDE.pdf

Double click the quick start guide.

STEP 2. Follow the quick start guide to get your system up and running fast and easy.

STEP 3. If at any time you need assistance for any reason contact H-ITT SUPPORT:

By Email: support@h-itt.com

By Phone: Toll free (888) 322-0089 in the USA, or (352) 503-6834 outside the continental USA.

Or Visit h-itt.com for additional information and other software packages available, or to see an online demo or to meet with your local H-ITT representative.

SPECIAL NOTE FOR POWERPOINT USERS WITH OFFICE 2007: If your PPT opens outside Acquisitions slide window, go to the "documents" folder and run the file named "H-ITTOffice2007Fix.reg".

Call or email H-ITT Support if you have any questions about using this demo kit.
